(11) 10 Year Finish Warranty

When you specify BRP by bison as your site furnishings supplier, you can feel confident that the product will look great not only the day it's installed, but also for years to come.

With over 25 years of finishing expertise, we know what it takes to create a long-lasting finish and back up that expertise with a 10-year finish warranty on Weatherbeater Mastercoat™ and hot dip galvanized finishes.

Select the finish that best satisfies your site furnishing needs.

Weatherbeater Mastercoat™ Finishes

It takes attention to detail to feel confident offering a 10-year warranty on outdoor finishes. BRP by bison starts with 100% welded construction on most products eliminating the risk of finish failure at assembly points. Sandblasting, 5-stage wash and conversion coating prep the material for proper powder coating application and curing. The specially formulated epoxy primer and textured Weatherbeater finish coat when properly precured, then cured, will produce a tough bond and minimum 8 mil average finish thickness. Lollipop and custom colors are sandblasted, powder coated with the custom polyester color coat and then clear coated with a protective clear textured finish.

Choose from the standard colors shown or contact us about the availability of custom colors.

Standard Weatherbeater Mastercoat™ Colors

Lollipop Weatherbeater Mastercoat™ Colors

BRP by bison's Lollipop colors are fun and vibrant, adding a hint of whimsy to any landscape or streetscape, and are available on all site furnishings.

Rustic Weatherbeater Mastercoat™ Color

Perfect for natural settings, our matte finish Rustic color lends a naturally weathered steel look to your landscape furnishings and is very similar to the look of our "weathering" signs and silhouettes on pages 32 and 33.

Primer for Onsite Finishing

When painting will occur at the jobsite, select a primed powder coated finish suitable for latex or oil based finishes.

Safety Yellow

Bollards and barriers can be powder coated a smooth Safety Yellow.

Hot Dip Galvanized Finish

While we only offer a 10-year warranty, in reality you should consider this a lifetime finish in most applications. All hot dip galvanizing is done after all fabrication and welding is complete to assure maximum coverage of all areas. Our hot dip galvanized option is especially good for bike security stations and bollards. Under normal circumstances, it is not advisable to hot dip galvanize benches or receptacles.

Stainless Steel

A limited number of BRP products are available in stainless steel for a lifetime of beauty.
